with the same to think

with horror to think  
women out there  
NuvaRing and other  
hormonal  
contratives because they  
there is no alternative  
but an unplanned  
pregnancy. If you are using it,  
take the time to  
research the ParaGard copper  
intrauterine methods, and the  
benefits of fertility-awareness

because it is doing a huge  
diservice to women when  
reports written about  
the safety of hormonal  
contratives end with the  
big message that it is  
dangerous to be

This scares women  
from exploring their  
options and stops them from  
researching enough to at least  
understand the symptoms they  
look out for –  
information that could save  
lives. I believe the  
message that NuvaRing and  
other hormonal  
contratives are harmless  
and safe is dangerous and harmful in

includes: "Our  
goal is that more lives  
be saved by the sharing of  
information."

For sincere  
information to the friends,  
loved ones of Karen
